

R-SEAL

DESCRIPTION

R-SEAL is a water-based acrylic clear sealer for use in interior or exterior applications. It provides excellent protection against the natural elements and acts as a sealing coat against water penetration or in the case of tiles, staining coffee, oil, grease etc.

USES

R-SEAL can be used for the following purpose:-

- As a protective sealer concrete floor for longer wearing surface.
- As a dust proofer for newly laid concrete floors.
- As a abrasion resistance layer to withstand light to medium traffic on factory floors.
- To protect wall and floor tiles from stain.
- To protect marble, granite and other porous stones from stains.
- To provide the glossy look to old and worn out tiles surfaces.
- As a water proofer for brick walls in cases where water seepage is occurring.
- As a liquid water repellent for concrete or masonry surfaces.

ADVANTAGES

- Inhibits fungus and bacteria growth.
- Protects and beautify old worn out ceramic tiles at a economic cost.
- Non-yellowing.
- Protects substrate against the natural elements.
- Resistance to ultra-violet degradation.
- High water repellent properties.
- Resistance to mild acids and certain chemicals to a certain extent.
- Convenient and easy to use.

TYPICAL PROPERTIES

Meets and exceeds BS, ANSI and AS Standards for water repellency and water absorption tests.

MIXING AND APPLICATION

R-SEAL comes in 20 litres pack and no mixing is required before use. However ensure substrate to be applied is free from dirt, grease, fungus, algae or other contaminants before application.

All loose foreign material shall be removed and surface should be dry prior to applications.

R-SEAL can be either brushed on or sprayed. Normally 2 coats are sufficient and care must be taken to ensure first coat is sufficiently dry before application of the second coat.

CONSUMPTION

Approximately 10-12m² per litre.

PACKING

R-Seal comes in 20 litres plastic containers.
